

BLOW MOULDING

HD 5301 EA

HD 5301 EA is a high density polymer grade with a broad molecular weight distribution for medium and large blow moulded applications where a combination of high environmental stress cracking resistance and good rigidity is required.

HD 5301 EA has the following characteristics:

Very high environmental stress cracking resistance.

Good rigidity.

High melt strength.

High impact strength.

Applications:

- *High performance blow moulded containers typically more than 220 liters capacity for packaging aggressive products.*
